## Ocean Energy Bureau, Interior

- (c) Unusual solid and liquid wastes. A description of the quantity, composition, and method of disposal of any unusual solid and liquid wastes (attributable to your proposed exploration activities) likely to be generated by the onshore support facilities you will use. Unusual wastes are those wastes not specifically addressed in the relevant National Pollution Discharge Elimination System (NPDES) permit.
- (d) Waste disposal. A description of the onshore facilities you will use to store and dispose of solid and liquid wastes generated by your proposed exploration activities (see §250.217) and the types and quantities of such wastes.

## § 250.226 What Coastal Zone Management Act (CZMA) information must accompany the EP?

The following CZMA information must accompany your EP:

- (a) Consistency certification. A copy of your consistency certification under section 307(c)(3)(B) of the CZMA (16 U.S.C. 1456(c)(3)(B)) and 15 CFR 930.76(d) stating that the proposed exploration activities described in detail in this EP comply with (name of State(s)) approved coastal management program(s) and will be conducted in a manner that is consistent with such program(s): and
- (b) Other information. "Information" as required by 15 CFR 930.76(a) and 15 CFR 930.58(a)(2)) and "Analysis" as required by 15 CFR 930.58(a)(3).

## § 250.227 What environmental impact analysis (EIA) information must accompany the EP?

The following EIA information must accompany your EP:

- (a) General requirements. Your EIA must:
- (1) Assess the potential environmental impacts of your proposed exploration activities;
  - (2) Be project specific; and
- (3) Be as detailed as necessary to assist the Regional Supervisor in complying with the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*) and other relevant Federal laws such as the ESA and the MMPA.

- (b) Resources, conditions, and activities. Your EIA must describe those resources, conditions, and activities listed below that could be affected by your proposed exploration activities, or that could affect the construction and operation of facilities or structures, or the activities proposed in your EP.
- (1) Meteorology, oceanography, geology, and shallow geological or manmade hazards;
  - (2) Air and water quality;
- (3) Benthic communities, marine mammals, sea turtles, coastal and marine birds, fish and shellfish, and plant life:
- (4) Threatened or endangered species and their critical habitat as defined by the Endangered Species Act of 1973;
- (5) Sensitive biological resources or habitats such as essential fish habitat, refuges, preserves, special management areas identified in coastal management programs, sanctuaries, rookeries, and calving grounds;
  - (6) Archaeological resources;
- (7) Socioeconomic resources including employment, existing offshore and coastal infrastructure (including major sources of supplies, services, energy, and water), land use, subsistence resources and harvest practices, recreation, recreational and commercial fishing (including typical fishing seasons, location, and type), minority and lower income groups, and coastal zone management programs;
- (8) Coastal and marine uses such as military activities, shipping, and mineral exploration or development; and
- (9) Other resources, conditions, and activities identified by the Regional Supervisor.
- (c)  ${\it Environmental impacts.}$  Your EIA must:
- (1) Analyze the potential direct and indirect impacts (including those from accidents, cooling water intake structures, and those identified in relevant ESA biological opinions such as, but not limited to, those from noise, vessel collisions, and marine trash and debris) that your proposed exploration activities will have on the identified resources, conditions, and activities;
- (2) Analyze any potential cumulative impacts from other activities to those identified resources, conditions, and
